

Gedeon Ndunde Gibango

Senior Frontend Developer | React, Next.js, Angular & TypeScript | Scalable Enterprise & SaaS Platforms

Centurion, Gauteng, South Africa | gedeon.gibango@gmail.com | [linkedin.com/in/gedeongibango](https://www.linkedin.com/in/gedeongibango)

PROFESSIONAL SUMMARY

Senior Frontend Developer with 6+ years of experience building scalable, high-performance web applications using React, Next.js, Angular, and TypeScript — across enterprise, SaaS, and fintech platforms, with a consistent focus on performance, maintainability, and user experience. Translate complex business requirements into clean, responsive, production-ready frontend systems.

Led a team of 7+ frontend developers across finance and SaaS platforms, owning technical direction, code review, and delivery. Founder of a registered software engineering company, shipping full-stack SaaS products end-to-end.

TECHNICAL SKILLS

- Frontend: React, Next.js, Angular, AngularJS, TypeScript, JavaScript (ES6+), HTML5, CSS3, Vite
- Backend Integration: REST API integration, multitenant architecture
- State Management: Redux Toolkit, Zustand, TanStack Query, RxJS
- Styling & UI: Tailwind CSS, Styled Components, Storybook
- Testing: Jest, React Testing Library, Cypress, Playwright, Vitest
- DevOps: CI/CD deployment pipelines
- Development Practices: Responsive Design, Accessibility (WCAG), Component-Driven Development, Performance Optimization
- Tools: Git, GitHub, Jira

PROFESSIONAL EXPERIENCE

OpenFactor Technology Group

February 2020 – November 2026 (6+ years)

Johannesburg, South Africa — progressed from Software Engineer Intern to Frontend Developer to Lead Frontend Developer

Lead Frontend Developer

July 2023 – November 2026

- Led a team of 7+ frontend developers with full scope: technical direction, code review, hiring input, performance reviews, and sprint/roadmap ownership.
- Built and integrated multitenant frontend applications against REST APIs, using Vite-based tooling and deploying through the team's existing CI/CD pipelines.
- Introduced Redux Toolkit, Zustand, and TanStack Query as the team's state management standard.
- Established reusable component libraries using Storybook, adopted across frontend projects.
- Modernized legacy frontend modules while preserving system stability.
- Ran code reviews and mentored junior developers as part of day-to-day team leadership.

Frontend Developer

February 2021 – June 2023

- Built and maintained production web applications in React, Angular, and TypeScript across finance and SaaS platforms.

Software Engineer Intern

February 2020 – February 2021

- Started my career on the frontend team, contributing to production web applications before progressing to a full developer role.

Frontend Developer — Independent Consultant (Part-Time)

March 2024 – May 2026

Fintech Lending Platform, UK / Nigeria

- Delivered scoped frontend work for a UK/Nigeria fintech lending platform outside of full-time hours, engaged on a task basis: attended scoping meetings, provided delivery timelines, and reported progress independently.
- Owned frontend architecture decisions within scoped engagements, using Angular and TypeScript.
- Delivered against a fully distributed team structure spanning UK and Nigeria time zones.

Founder

June 2026 – Present

NDUNDECODE (Pty) Ltd, Johannesburg, South Africa

Registered South African software engineering company

- Founded a registered software engineering company and independently designed, built, and deployed two production SaaS platforms within the first 3 months, owning frontend, backend, and deployment end-to-end.
- NduCore — multitenant lending operating system covering origination, disbursement, servicing, and collections, with maker/checker approvals and audit trails. Built with Next.js and a Laravel API backend.
- NduLearn — AI-assisted exam-prep platform with an AI-graded writing and speaking examiner, for TEF Canada, IELTS General Training, and TCF Canada. Built with Next.js and a Laravel API backend.
- Deploy all frontend applications via Vercel with automated CI/CD.

EDUCATION

Bachelor of Science (BSc) in Computer Science

Eduvos (formerly Pearson Institute) — Johannesburg, South Africa — 2019
